

Robert Herring

Web Developer

My name is Robert. I first used a computer in 1988, but as a first grader, I didn't fully realize its potential. I didn't get serious about them until my dad brought home our first desktop, the IBM Aptiva, in 1997. It was then, in September of '97, that I built my first website. While it wasn't the most amazing site ever created... I'm sure it was a close second. From there, I got into design, and it was the marriage of code & design is where I really found my passion.

JOB EXPERIENCE

LEAD WEB DEVELOPER IN MARKETING: GIS in CHAPIN, 2014 - PRESENT

Designed and developed [GIS's](#) entire responsive website from the ground up. Worked with high profile clients designing the interface for their onboarding portals, and Filmed and produced several in house videos.

LEAD DEVELOPER: THE PARA FIRM in COLUMBIA, 2012 - 2013

Developed high end websites that includes E-Commerce and Parallax websites, as well as developed an in-house iPad app, using xCode, used to sell TPF's marketing solution.

FREELANCE WEB DEV / DESIGN: Lexington, 2011 - 2012

Developed interactive Flash sites, Website Mockups and Wireframes, Marketing Campaigns, Print Ads, Web Banners, and Motion Graphics.

ART DIRECTOR: SPLASH OMNIMEDIA in LEXINGTON, 2008 - 2011

Developed cutting edge, standards compliant websites. Worked in print design, web design, email campaigns, trade show booth design, and branding. I created wireframes, mock ups, prototypes, front-end code, and back-end code.

EDUCATION

FULL SAIL UNIVERSITY: BACHELOR of SCIENCE in DIGITAL ARTS & DESIGN in 2008

The **Digital Arts & Design** degree provided a complete design education, with industry-specific courses that teaches you how to communicate ideas and stories through different media, including **video**, **print**, **motion graphics**, and the **web**.

MIDLANDS TECHNICAL COLLEGE: ASSOCIATES of ARTS in 2003

The **Commercial Graphics** program at Midlands Technical College is designed to provide qualified support technicians for the printing industry.

Robert Herring

Web Developer

Here you'll find a few of the most recent pieces of my portfolio along with a short description of each and my involvement on the project.

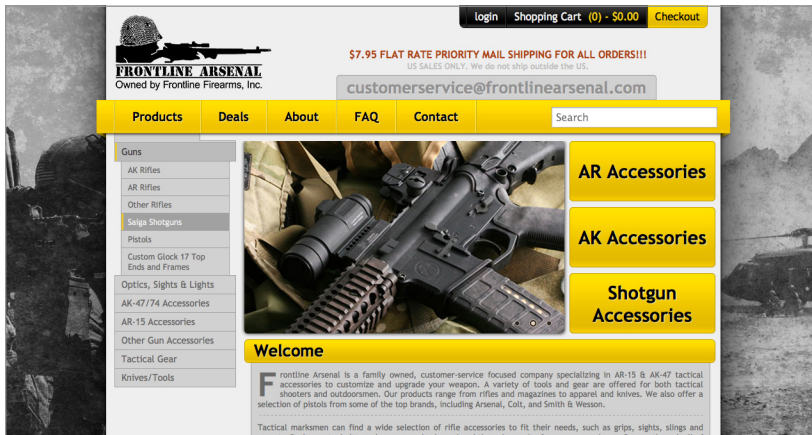

To view more of the projects I've worked on, please go to my website: <http://www.Robert-Herring.com>

GENERAL INFORMATION SERVICES: CORPORATE WEBSITE, 2015

General Information Services is one of the largest background check companies in America. Using the latest methods of jQuery, HTML5, and CSS3, I was able to develop a state of the art, responsive website.

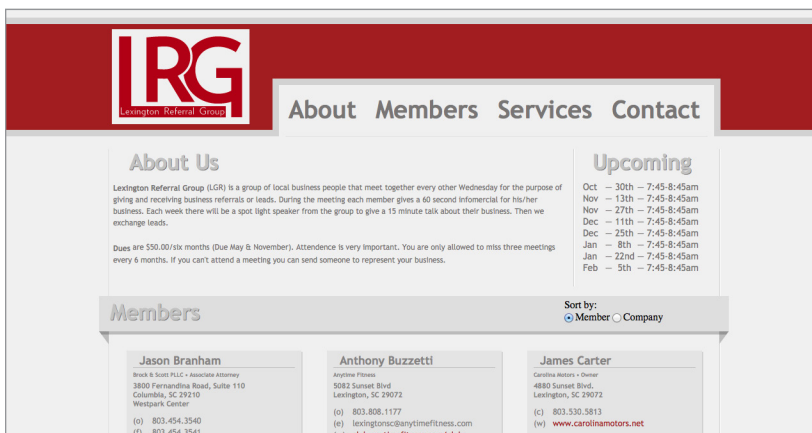

I completely designed and developed this entire site in just under a year.

FRONTLINE ARSENAL: E-COMMERCE WEBSITE, 2013

Frontline Arsenal went from earning twenty thousand dollars a month in sales, to over one hundred thousand dollars in sales in a single month after we built their new site.

I helped design and completely developed this site in a three month span.

LEXINGTON REFERRAL GROUP: MEMBER'S WEBSITE, 2011

Lexington Referral Group came to me in 2011 needing a way to explain who they are and what they do, display their members, meeting times, and meeting location.

I designed and developed the entire website in three weeks.
