## JOB EXPERIENCE

### **Full Stack Software Engineer: AcquireCrowd in California (Remote)**

**Jun 2022 - Oct 2022**

- HTML, CSS (TailwindCSS), JavaScript (Vanilla, VueJS), PHP (Laravel - v8, v9)
- As a software engineer, I developed internal platforms for the company that enabled each department to communicate and create work requests. I developed them using the latest standards in Laravel, Vue.js, and Tailwind CSS.
- I helped maintain the company's main revenue generating website, using Laravel, VueJS, and Tailwind CSS.
- I created over 50 individual websites used to generate lead revenue. The sites were developed using plain HTML, Tailwind CSS, and Vanilla JavaScript.

**Software Engineer: LoudDoor in Columbia, SC****2021 - 2022**

- HTML, CSS (TailwindCSS), JavaScript (Vanilla, VueJS), PHP (Laravel - v5, v8)
- As a software engineer, I helped develop several websites used to generate buzz around, and to sell NFT's online.
- I was responsible for the front-end development, look, feel, and user experience, as well as setting up the database to capture the users information and movements on the sites. I also helped maintain several websites they used for other businesses they managed. The majority of the websites were Laravel or Vite sites, with one being a Shopify E-Commerce site.

**Full Stack Designer: Diesel Laptops in IRMO, SC****2018 - 2021**

- HTML, CSS (SCSS, Bootstrap), JavaScript (Vanilla, jQuery), PHP, Liquid, Shopify, WordPress
- Lead Web Developer on a team of seven.
- Developed their three main e-commerce websites using Shopify as the CMS, and developed the sites using LIQUID, PHP, HTML, CSS, SCSS, and jQuery.
- Maintained and managed the corporate Wordpress websites until we transitioned to Shopify
- Aided in the design of each of the three corporate websites, product packaging, conference booths, materials for conferences and sales reps, and produced and edited corporate videos using the software from the Adobe Creative Suite like Photoshop, Illustrator, InDesign, Premiere Pro, and After Effects.

**Marketing Specialist: IMCS in IRMO, SC****2017 - 2018**

- HTML, CSS (Bootstrap), JavaScript (Vanilla, jQuery), PHP
- Maintained the look and feel of the corporate website.
- Produced and edited corporate videos, including a 360 immersive experience.
- Designed product packaging, conference booths, and print material for conferences and sales reps.

**Lead Web Developer in Marketing: GIS in CHAPIN, SC****2014 - 2017**

- HTML, CSS (Bootstrap, LESS), JavaScript (Vanilla, jQuery, REACT, Angular, Node), .NET
- Lead Web Developer on a team of five.
- Designed and developed GIS 's entire responsive website from the ground up.
- Worked with high-profile clients designing the interface for their onboarding portals.
- Filmed and produced several in-house videos.

**Lead Developer: The Para Firm in Columbia, SC****2012 - 2013**

- HTML, CSS (Bootstrap, LESS, SCSS), JavaScript (Vanilla, jQuery), PHP, xCode, Magento, WordPress
- Lead Developer on a team of five.
- Developed high end websites that included E-Commerce (Magento) and Parallax websites (WordPress, Custom CMS), as well as developed an in-house iPad app, using xCode, to sell TPF's marketing solution to new clients.

**Full Stack Developer: Disciple Christian Motorcycle Club,****2009 - 2021**

- HTML, CSS (Bootstrap, LESS, SCSS), JavaScript (Vanilla, jQuery, Vue, REACT, Angular, Node), PHP (Laravel - v8), Liquid, Shopify, WordPress
- In 2009, designed, developed, and maintained Disciple's first website.
- Helped create the look and feel of non-profit both online and in real life.
- Develop products and apparel to be sold both online and at in-person events.
- August of 2014 I redesigned, developed, and maintained the new site using PHP, CSS, REACT, and Angular.
- October of 2016 started designing and developing their current e-commerce platform that launched on January 1, 2017.
- Designed and developed a completely new (anti)social media platform from scratch using Laravel, Vue JS, Node, and CSS for the Christian organization so they can have a secure location online for communication.
- Helped with video and motion graphics production.

**Art Director: Splash Omnimedia in Lexington, SC****2008 - 2011**

- HTML, CSS (Bootstrap, LESS, SCSS), JavaScript (Vanilla, jQuery), Flash, PHP, WordPress
- Developed cutting edge, 508 compliant websites. Created print design, web design, email campaigns, trade show booth design, and branding for several clients. I created wireframes, mock ups, prototypes, front-end code, and back-end code.

**Senior Developer: AV Books in Pompano Beach, FL****2008 - 2008**

- HTML, CSS (Bootstrap, LESS, SCSS), JavaScript (Vanilla, jQuery), Flash, PHP
- Senior Developer on a team of five.
- Managed the development of everything from concept to completion while also having a hand in most of the work. All work was created using Adobe Flash to be installed on Windows or Mac.

**EDUCATION****Full Sail University: Bachelor of Science in Digital Arts & Design****2006 - 2008**

The Digital Arts & Design degree provided a complete design education, with industry-specific courses that teaches you how to communicate ideas and stories through different media, including video, print, motion graphics, and the web.
